IMPORTANT INFO FOR CROSS-COUNTRY ACTIVITIES: Only a “Jockey Skull” of an even round or elliptical shape with a smooth or slightly abrasive surface, having no peak or peak type extensions should be worn for any XC activity. Noticeable protuberances above the eyes or to the front, not greater than 5mm, smooth and rounded in nature are permitted. A removable hat cover with a light flexible peak may be used.

HEAD CAMS: When hats are tested against the requirements of a standard, they are done so with no extra additions on the hat i.e. with no head cam attached. Therefore, it is currently not known how the addition of a protuberance such as a head cam, affects how the hat would respond during an impact. Therefore, the use of HEAD CAMS are not recommended at any BHS activity. This includes use on the head, chest, bridle or any other part of the horse or rider.

Body Protector Standards

From 1st January 2024, the **Level 3 blue BETA 2018** standard will be required when riding at any British Eventing event. This means the **purple BETA 2009** safety certification **will no longer be permitted**.

There are three different levels: Level 1, Level 2, and Level 3, with Level 3 being recommended for working with horses and competing in events like jumping and eventing, and is designed to prevent minor injuries.

Body protectors are a mandatory piece of safety equipment required while riding cross-country and over solid fences in arena eventing during all British Eventing affiliated events.

They are designed to protect a rider by absorbing the high levels of energy created when falling off a horse or being kicked or stepped on by a horse. A correctly-fitted body protector can offer protection to the abdomen and internal organs, chest and ribs, and prevent against soft tissue injuries.

Levels of protection

There is one specification for air-inflatable equestrian body protectors: Satra M38.
